Warm up with natural gas rebates

CenterPoint Energy's rebate program for heating systems for smaller buildings or supplemental heat can help you more affordably add new, high-efficiency natural gas equipment or upgrade your existing heating system with retrofit equipment.

Investing in replacement or new heating equipment is easier with help from CenterPoint Energy's rebate programs. You'll cut energy costs for years to come; receive an immediate cost savings rebate and ensure your employees and customers are warm and comfortable.

Heating system rebates

Primary heating Equipment	Efficiency	Rebate amount
Natural gas forced-air furnace	90% to 94.9% AFUE	\$400
Natural gas forced-air furnace	95% AFUE or higher	\$600
Hydronic heating system	82% AFUE or higher	\$400

Back-up heating system rebates*

Equipment	Efficiency	Rebate amount
Natural gas forced-air furnace	80 to 89.9% AFUE	\$125
Natural gas forced-air furnace	90% AFUE or higher	\$175

AFUE-Annual Fuel Utilization Efficiency

**Back-up heating system rebates apply only to new natural gas furnaces used as a back-up system to heat pumps.*

Note: Efficiency will be determined by using the Air-Conditioning, Heating and Refrigeration Institute (AHRI) rating system.

See www.ahridirectory.org

Note: Replacing an electric resistance furnace for a natural gas system is not eligible for a rebate.

More great energy-saving programs

High-efficiency natural gas water heaters

With CenterPoint Energy's water heater rebate program, you can efficiently heat water while saving energy and money. Install a high-efficiency natural gas tank water heater with a 62-64 percent or greater energy factor and receive a \$75 rebate. Or, install a tankless water heater with an 80 percent or greater energy factor and receive a \$500 rebate.

Rebates for customized energy solutions

The Commercial & Industrial Solutions Program offers FREE water-saving measures that include low-flow spray valves and faucet aerators, as well as rebates toward other high-efficiency equipment and energy-saving processes. Depending on the facility type and operating characteristics, eligible measures may include:

- Boiler retrofits and improvements
- Controls
- HVAC systems

Continued on back

Gas is simply greener

Now, saving money and our environment go hand-in-hand. Natural gas is a clean-burning fuel that has less impact on the environment.

Compared to other fuels, natural gas releases:

- Less than half the amount of carbon dioxide (a major greenhouse gas)
- Almost no sulfur dioxide (a major cause of acid rain and haze)
- Less than one-third the amount of nitrogen oxides (the primary cause of smog)
- No mercury emissions (makes some fish unsafe to eat)

Measure how your choices impact the environment by visiting our energy costs and emissions calculator at CenterPointEnergy.com/EnergyCalculator.

- Process efficiency improvements
- Water heating improvements
- Building thermal improvements
- FREE low-flow spray valves and faucet aerators
- Other natural gas-related equipment and processes

Start saving now

Rebates are awarded on a first-come, first-served basis until funds are depleted.

Program funds are anticipated to be available annually and are subject to approval from the Arkansas Public Service Commission. Please check program website for updates.

Three easy steps

1. Purchase and install qualifying equipment at a location with natural gas service from CenterPoint Energy in Arkansas or the Texas communities of Texarkana, Nash, Redwater or Wake Village.
2. Complete rebate form, available online at CenterPointEnergy.com/ArkansasRebates or by calling 888-498-0409.
3. Submit rebate form with a copy of your dated sales invoice. Invoice/receipt must include brand, model number, serial number, purchaser's name and installation address.

Program deadlines

- Program dates are Jan. 1, 2012 – Dec. 31, 2012.
- In order to secure your rebate, please send in your rebate application within 90 days of installation or by calendar year-end (Dec. 31), whichever comes first.

Always There.®
