

NATURAL GAS – THE BETTER CHOICE

Choosing natural gas is the best energy choice you can make today.

Clean-burning, abundant and reliable natural gas is a better choice than electricity. That's because it does not require a pollution-producing, energy wasting conversion process required for the generation of electricity. Natural gas provides optimum customer satisfaction because it is the more efficient, economical and cleaner energy option. Choose natural gas – today's choice for a cleaner tomorrow.

NATURAL GAS

From natural gas wells

To the natural gas processing plant

Delivered to underground interstate pipelines at 98% efficiency

To the town border stations

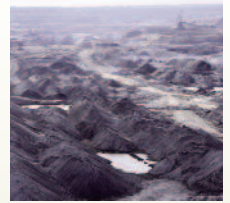

Delivered to the home at 90% efficiency

ELECTRICITY

From COAL mines

To the coal power plant

Delivered to overhead transmission lines at 33% efficiency

To the electric substation

To neighborhood power lines

Delivered to the home at 27% efficiency
