

GIVING YOU MORE HEALTHY REWARDS

2012 COMMERCIAL FOODSERVICE EQUIPMENT REBATE PROGRAM

Serve the best quality food, while also reducing your energy costs with the ultimate pairing of natural gas foodservice equipment and CenterPoint Energy rebates. Let us help you cut both your energy use and operating costs, while also minimizing the cost of equipment purchases with rebates on natural gas foodservice equipment.

Whether your business is a school cafeteria, office building, restaurant, deli or another type of foodservice operation, we have rebates that can help you increase quality, add efficiency and reduce energy costs. CenterPoint Energy's rebate program will help you improve your facility's energy efficiency for less.

Visit CenterPointEnergy.com/ArkansasRebates for:

- General foodservice equipment fact sheets
- Energy-saving tips

High-efficiency natural gas foodservice equipment eligible for rebates

Broilers, infrared upright \$600

Get great tasting food with cosmetic markings in one-third the time of a natural gas radiant broiler and using 40 percent less energy.

Charbroilers, infrared \$300

Yield great results with infrared charbroilers and save nearly 40 percent in energy costs over natural gas radiant charbroilers.

Combi ovens \$1,000

The combi oven can perform three cooking modes: steam, convection or a combination of both, all in one space-saving footprint. It also uses 40 percent less energy than standard natural gas equipment.

Convection ovens \$500

Save energy by cooking up to one-third faster and at lower temperatures than conventional natural gas range ovens and enjoy the same great results.

Conveyor ovens \$750

Add speed and uniformity to your operation and keep energy costs manageable.

Fryers, high-efficiency or infrared \$250

Increase production and use less energy over standard natural gas fryers.

Pasta cookers \$200

Use 40 percent less energy than with a standard range to cook or reconstitute pasta and rethermalize other pre-cooked foods.

Rotating rack ovens \$500

An efficient way to produce high-volume and high-quality food.

Rotisserie ovens, infrared \$500

Display your product while cooking with this energy-efficient equipment. Plus, the rotation and even heat distribution traps flavor for excellent results.

Salamander broilers, infrared \$150

Save space with this compact design and save 30 percent in energy costs over a standard natural gas radiant broiler.

Continued on back

Gas is simply greener

Now, saving money and our environment go hand-in-hand. Natural gas is a clean-burning fuel that has less impact on the environment.

Compared to other fuels, natural gas releases:

- Less than half the amount of carbon dioxide (a major greenhouse gas)
- Almost no sulfur dioxide (a major cause of acid rain and haze)
- Less than one-third the amount of nitrogen oxides (the primary cause of smog)
- No mercury emissions (makes some fish unsafe to eat)

Measure how your choices impact the environment by visiting our energy costs and emissions calculator at CenterPointEnergy.com/EnergyCalculator.

Start saving now

Rebates are awarded on a first-come, first-served basis until funds are depleted.

Program funds are anticipated to be available annually and are subject to approval from the Arkansas Public Service. Please check program website for updates.

Three easy steps

1. Purchase and install qualifying equipment at a location with natural gas service from CenterPoint Energy in Arkansas or the Texas communities of Texarkana, Nash, Redwater or Wake Village.
2. Complete rebate form, available online at CenterPointEnergy.com/ArkansasRebates or by calling 888-498-0409.
3. Submit rebate form with a copy of your dated sales invoice. In order to secure your rebate, your rebate form must be submitted within 90 days of installation date or by Dec. 31 of the calendar year of installation, whichever comes first.

Additional rebates available

CenterPoint Energy offers more than foodservice rebates. Purchasing natural gas water heaters and other natural gas heating systems can help you increase your bottom line. Your rebate savings heat up even more with greater efficiency installations.

With CenterPoint Energy's water heater rebate program, you can efficiently heat water while saving energy and money. Install a high-efficiency natural gas tank water heater with a 62-64 percent or greater energy factor and get a rebate of up to \$75. Or, install a tankless water heater with an 80 percent or greater energy factor and get a rebate of up to \$500.

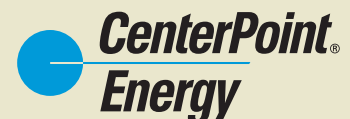

FREE low-flow spray valves and faucet aerators

The Commercial & Industrial Solutions Program technicians will install – at no cost to you – natural gas and water-saving products, as is appropriate for your operation. Items commonly include high-efficiency spray valves and faucet aerators. Together, these measures can save you hundreds of dollars per year in natural gas and water costs. Best of all, they're available at no cost to you, and installation is free, too! See the chart below for natural gas and dollar savings.

Utility savings achieved with low-flow pre-rinse spray valves

Daily hours of use	Daily water savings (gallon)	Daily sewer savings (gallon)	Daily gas savings (therms)	Annual dollar savings
1	60	60	0.5	\$250
2	120	120	1	\$500
3	180	180	1.5	\$750
