Texas Honing, Inc. to Expand

PEARLAND, Texas - Texas Honing, Inc. broke ground in June on a new 25,000-square-foot facility at 1710 Mykawa Pearland, Texas. With this expansion, the company will own two buildings that collectively encompass 95,000 square feet of manufacturing and office space.

"Market demands made us realize that we needed to expand," said Mark Keys, the company's chief financial officer. "We simply had more work than we could do in our current facility. This new building will increase our capacity and allow us to better meet our customers' needs."

To help finance the expansion, the PEDC awarded Texas Honing an \$80,000 grant in July 2006. It will be delivered in two installments -- \$40,000 upon obtaining a certificate of occupancy and \$40,000 at the end of the first year, contingent upon Texas Honing creating 20 new jobs in the Pearland community. The PEDC is also assisting the company with applications for city and county tax abatements.

Keys said the expansion should be complete by the end of December 2007.

Texas Honing, Inc. specializes in deep-hole drilling, boring, turning, straightening, vertical and horizontal honing, design and consulting services for the steel and oil and gas industries.
