

## CenterPoint Energy helps income-qualified customers with these dedicated low income programs

### Home Energy Squad

A natural gas and electric energy efficiency program for homeowners and renters, jointly offered by Xcel Energy and CenterPoint Energy. Customers receive a home visit, which may include an energy audit, and direct installation of low-cost energy efficiency measures. The home visit is free for low-income customers.

Call 866-222-4595 to sign up. For more information visit [HomeEnergySquad.net](https://www.homeenergysquad.net)

### Low Income Weatherization

Provides a free home energy assessment to determine ways to improve homeowners' comfort and energy efficiency. Measures installed at no cost to income-qualified homeowners or renters may include: free attic and wall insulation, sealing of air leaks, plus repair or replacement of natural gas furnace (or boiler) and water heater.

Services are provided through local Community Action Partnership agencies: <https://mn.gov/commerce/consumers/consumer-assistance/weatherization/wap-providers.jsp>

### Low Income Rental Efficiency

Offers incentives for energy-saving improvements made by owners of one- to four-unit dwellings that house income-eligible renters. This shared-cost model provides a free energy audit and pays 50 percent of the cost for qualifying installed weatherization upgrades and high efficiency equipment replacements. Rental properties with 50 percent or more of units occupied by income-qualified tenants are eligible to participate.

Services are provided through our program partner, Energy Cents Coalition:

### Multi-Family Building Efficiency Program

Offered in partnership with Xcel Energy, this program provides a "one-stop shop" to help owners of multi-family buildings target whole-building natural gas and electric energy efficiency savings. A free energy audit and free direct-install of efficiency measures for resident and common spaces are the first step.

## Affordable Housing Multi-Family Bonus Rebates

Program provides bonus rebates for high-efficiency natural gas equipment installed in multi-family buildings with five or more units. Eligible buildings must be low-income qualified.

Learn more at: [CenterPointEnergy.com/AffordableHousingMultiFamily](https://CenterPointEnergy.com/AffordableHousingMultiFamily)

## Non-Profit Affordable Housing Rebates

Program offers substantial incentives for energy efficiency measures installed by partnering affordable housing organizations in their one- to four-unit new construction and retrofit low income housing. Rebates cover the approximate incremental cost for upgraded insulation and air sealing, plus higher-efficiency natural gas heating, water heating and other equipment in projects sold to income-qualified homebuyers or operated by the organization as rental units.

## Low Income Heating System Tune-Up (aka "Stay Safe Stay Warm")

Provides free heating system tune-ups and safety checks for income-qualified customers. Services are delivered in cooperation with several local Community Action Partnership (CAP) Agencies; availability is limited to participating agencies. Services are typically provided January through April each year. Customers may call participating CAP Agencies to inquire about availability.
