

# Helping YOU Save Money

## Dial up energy savings.

Save energy and money on some of the hardest working equipment in your facility with CenterPoint Energy's rebate programs for boiler systems and components. Cut energy costs for years to come, and you'll get a rebate for immediate cost savings.

## Boiler and boiler system components

Equipment	Rebate	Efficiency rating	
<b>High-efficiency boilers</b> (minimum 100,000 Btu – 12.5 MMBtu)	<b>\$1,400/MMBtu input</b>	85 - 91.9%	not to exceed 25% of equipment costs, \$4,300/facility cap
	<b>\$2,000/MMBtu input</b>	≥ 92%	not to exceed 25% of equipment costs, \$6,000/facility cap
<b>Fully-modulating or 6-step modulation boiler burners</b>	<b>\$1,000/MMBtu input</b>		not to exceed 25% of equipment cost
<b>Vent dampers</b>	<b>up to \$250/boiler</b>		not to exceed 35% of equipment and installation cost
<b>Boiler reset controls</b>	<b>Up to \$150</b>		per control system; not to exceed equipment cost
<b>Boiler cut-out controls</b>	<b>Up to \$150</b>		per control system; not to exceed equipment cost

\*Boiler efficiency must be certified by the Air-Conditioning, Heating, and Refrigeration Institute (AHRI). The AHRI directory is available at [ahridirectory.org](http://ahridirectory.org). If boiler is not listed on AHRI, is larger than 12.5 MMBtu or is used in process applications, please contact Olivia Barq.

## More great energy-saving programs

### High-efficiency natural gas water heaters

With CenterPoint Energy's water heater rebate program, you can efficiently heat water while saving energy and money. Get a rebate of \$100 when you install a high-efficiency natural gas storage tank water heater with a  $\geq .64$  UEF medium draw or  $\geq .68$  UEF high draw. Or, install a tankless water heater and get a rebate starting at \$250.

### Other heating systems

Rebates are also available for new and replacement natural gas heating systems:

- Forced-air furnaces
- Hydronic heating systems

### Foodservice rebates

Rebates up to \$1,000 are available for five different types of commercial foodservice equipment, including combi ovens, convection ovens, fryers and more.

### Commercial Direct Install Program

Commercial Direct Install technicians will install no-cost natural gas water-saving devices at your facility/facilities to help reduce your energy use and increase efficiency. Typical install includes low-flow aerators and pre-rinse spray valves. The benefits include:

- Reduced energy and water costs
- Increased efficiency
- No-cost natural gas and water-saving measures
- Low-flow aerators reduce water use in hand washing sinks by approximately 50 percent.
- Pre-rinse spray valves offer the greatest opportunity for energy-savings — up to \$750 annually.

## Start saving now.

Rebates are awarded on a first-come, first-served basis until funds are depleted.

Program funds are anticipated to be available annually and are subject to approval from the Mississippi Public Service Commission. Please check program website for updates.

### Three easy steps

1. Purchase and install qualifying equipment at a location with natural gas service from CenterPoint Energy in Mississippi. Rebate will be paid once equipment is installed and operational.
2. Complete rebate form, available online at [CenterPointEnergy.com/MSBusinessRebates](http://CenterPointEnergy.com/MSBusinessRebates).
3. Submit rebate form with a copy of your dated sales invoice. In order to secure your rebate, rebate applications must be received by Dec. 31 of the year of installation.

## Natural gas — did you know?

Affordable.

Natural gas costs substantially less to use than electricity, propane or heating oil.

Abundant.  
Domestic.

According to America's Natural Gas Alliance, there is more than a 100-year supply of natural gas reserves in the United States.

Safe.

Natural gas appliances have a great safety record and state-of-the-art equipment now has advanced capabilities, like auto shut-off.

Clean.

As a primary fuel that can be used in its natural state rather than undergoing a pollution-producing, energy-wasting conversion process, natural gas leaves about half the carbon footprint of electricity.

Comfortable.

- Natural gas water heaters recover faster and have more hot water available than electric water heater models, so you can count on having the hot water you need, when you need it.
- Heat delivered from a natural gas furnace feels warmer as the air delivered is 25 F warmer than air from an electric heat pump.
