

Delivering More Savings to YOU

CenterPoint Energy's Process Equipment Rebate Program is designed to help industrial customers who use natural gas equipment for process, not heating, save money and energy. Now you can more affordably add new, high-efficiency boilers and boiler system components or upgrade your existing process system.

Process equipment rebates

Equipment	Rebate	Efficiency requirement
Process boiler (steam)	\$500/MMBtuh input	≥ 83%
Process boiler (hot water)	\$500/MMBtuh input	≥ 85%
Industrial equipment tune-up	25% of tune-up cost	
Stack economizers (non-condensing)	\$500/MMBtuh input	
Stack economizers (condensing)	\$1,000/MMBtuh input

Capture more energy savings.

An audit of your industrial process steam distribution system can help increase its efficiency by identifying steam traps in need of replacement or repair.

Enjoy rapid payback when you combine eligible audit rebates with qualifying equipment rebates provided through our Process Equipment Rebate Program.

- Program eligibility is every other year.
- The program pays for the steam trap audit at a rate of \$15/tested trap up to 100 percent of the audit's cost.
