

Helping **YOU** Save Energy

Identify and capture energy savings.

As you look for ways to save money and energy in your facilities, CenterPoint Energy's Steam Trap Audit Program can help you recover wasted energy, providing immediate pay-back as well as long-term savings.

Steam Trap Audit Program

A steam trap failure can result in a substantial increase in natural gas consumption. An audit will help identify failed steam traps in need of replacement.

How the Process Steam Trap Audit Program works:

- Customers will be able to participate in the program every other year.
- Now available for heating and process customers.
- Any trade ally can conduct the audit. The auditor should, however, have the proper diagnostic equipment (i.e., infrared and ultrasonic).
- The program will pay for the steam trap audit at a rate of \$15/tested trap, up to 100 percent of the audit's cost, upon repair of all failed steam traps.

The audit funding is payable upon receipt of the:

- Program application
- Audit log sheet
- Invoice for the audit
- Invoice for repaired traps
- Invoice for the repair labor (or estimate for internal labor).

Start saving today.

For more information about the Steam Trap Audit Program, contact your account manager or call 612-321-4330 (800-234-5800, ext. 4330).

Program deadlines

All required documentation must be received by Dec. 31 of the year the audit and steam traps repairs are completed.

Did you know?

In steam systems that have not been maintained for 3 to 5 years, between 15 to 30 percent of the installed steam traps may have failed, possibly wasting energy and money!
