

# Offering **YOU** Flavorful Incentives

## Incentives for commercial foodservice customers

Whether your business is a school cafeteria, office building, restaurant, healthcare facility, or other type of commercial foodservice operation, we have incentives that can help you reduce energy costs, add efficiency, and increase quality. CenterPoint Energy's ENERGY STAR® commercial equipment incentive program can help you improve your facility's energy efficiency.

The CHEF Program connects eligible businesses with participating distributors who can offer an incentive at the point of sale for qualified ENERGY STAR® rated appliances.
