RE: Notice of Planned Participation 40 CFR 423.19 (h)
A.B. Brown Generating Station, NPDES Permit No IN0052191

Southern Indiana Gas and Electric Company (SIGECO), doing business as CenterPoint Energy Indiana South (CEIS) is submitting this 2034 Notice of Planned Participation for Combustion Residual Leachate under 40 CFR 423.19 (h) and providing in this submittal the information required under 40 CFR 423.19 (h). I certify that CEIS has permanently ceased the combustion coal at the A.B. Brown Generating Station as of October 7, 2023, which is well in advance of December 31, 2034, and is therefore in compliance with Bottom Ash Transport Water and FGD Wastewater limits.

CEIS has completed construction and initiated operation of simple cycle gas turbines at the A.B. Brown Generating Station and brought a 191 MW solar facility online to replace the coal-fired capacity and has several renewables projects currently underway. These projects are part of the overall generation transition plan to retire the A.B. Brown coal-fired combustion turbines in October 2023 and the F.B. Culley Unit 2 coal-fired combustion turbine in December 2025.

Please contact me at Angela.Casbon-Scheller@centerpointenergy.com or 812-491-4787 for any questions or if additional information is needed.

Sincerely,

Angela Casbon-Scheller *hcs*
