

Delivering Comfort and Efficiency to YOU

Warm up with natural gas rebates.

CenterPoint Energy's rebate program for heating systems for smaller buildings or supplemental heat can help you more affordably add new, high-efficiency natural gas equipment or upgrade your existing heating system with retrofit equipment.

Other heating systems

| Equipment | Rebate | Efficiency rating/requirements |
|-----------------------------------|---|--------------------------------|
| Forced-air furnaces | \$150/furnace | 92% - 93.9% AFUE |
| Forced-air furnaces | \$300/furnace | 94% - 95.9% AFUE |
| Forced-air furnaces | \$400/furnace | ≥ 96% AFUE |
| Smart thermostat | \$50/thermostat | |
| Condensing unit heaters | \$300/heater; not to exceed 25% of equipment cost | ≥ 88% thermal efficiency |
| Single package vertical unit | \$150/unit | ≥ 90% efficiency |
| Infrared heaters | \$250/heater | Low-intensity tube-type |
| CO garage sensors | \$100/sensor | Retrofit only |
| Garage door hinge (spring-loaded) | \$15/hinge | |
| Garage air curtains | \$25/sq ft garage door area | |
| Demand control ventilation | \$100/sensor | Retrofit only |
| Electronic ignition hearth | \$75/unit | |

More great energy-saving programs

Install a high-efficiency **natural gas water heater** with an ≥ 88 percent thermal efficiency and get a rebate of \$200 per 100,000 Btu input. Plus, we have rebates for **power vent and atmospheric tank water heaters** that are ≥ .64 UEF, ≥ .68 UEF and ≥ .80 UEF.

More great energy-saving rebates available for:

- **Natural gas water heaters**
- **Boiler systems**
- **Boiler tune-ups**
- **Boiler system components** — turbulators, burners, stack dampers, steam trap repair/replacement, reset and cut-out controls, pipe insulation, and linkageless controls

Natural Gas Energy Analysis

A Natural Gas Energy Analysis can help cut costs for businesses of any size.*

A certified energy auditor will visit the facility and:

- Inspect the building envelope and installed natural gas equipment
- Examine how the equipment is operating
- Identify opportunities to improve efficiency and potentially qualify for rebates

All analyses receive a detailed report with specific recommendations to help develop an energy-savings plan. Participants are also eligible for free direct-install natural gas-saving measures, including programmable thermostats, energy-efficient faucet aerators and showerheads, and weather stripping for exterior doors.

Analyses available

| Type of analysis | Scope | Co-pay |
|---|---|-----------------------------------|
| Basic analysis* | Basic review of facility with high-level report, covering non-process loads. Most appropriate for small customers. | \$50 |
| Comprehensive analysis** | Comprehensive review of facility with detailed technical report and calculations, covering non-process loads. Most appropriate for mid-to-large customers. | \$200 |
| Ad hoc services*** for specific energy use analysis, such as steam trap surveys for a heating system and infrared scans | Custom analysis and/or additional services targeted to special customer needs and preferences, including infrared scans, steam trap surveys, and analysis of process loads. | Based on services provided |

Note: The analysis does not include electric consumption, except as related to natural gas equipment, so it is not considered a comprehensive energy audit.

*Basic analysis is only available to customer with a Firm A or Firm B rate class.

**Customers with a Firm A and Firm B rate class may opt in to the comprehensive-level analysis.

***Ad-hoc services provides for specialty technical analysis of facilities, based on special needs of the customer, regardless of rate class. Customers with process loads, regardless of size will receive a custom analysis.

Program deadlines

- Program dates are Jan. 1 – Dec. 31
- Rebate applications must be postmarked by Dec. 31

Use energy that's better for the environment and your budget.

Count on us to deliver what you need now and in the future: low-cost, dependable energy that's getting cleaner every day

Affordable

Natural gas costs substantially less to use than electricity, propane or heating oil. Natural gas prices are consistently 2-3X lower than electric prices.*

Reliable

During the polar vortex of January 2019, we supplied the equivalent of more than 20,000 megawatts of power – more than the total capacity of all electricity generation in the state.

Clean

As a primary fuel, natural gas can be used in its natural state rather than undergoing a conversion process at a power plant that creates emissions and wastes energy.**

Efficient

Over the last 25 years, we've partnered with our customers to reduce their carbon footprint by 12.2 million metric tons. That is equal to the annual energy use of 2.4 million homes in Minnesota.

Innovative

We plan to reduce our operational emissions by 70% by 2035. And we'll reduce natural gas emissions from residential and commercial use by 20-30% by 2040, from 2005 levels.

Domestic

About 93% of the natural gas used in the United States comes from within U.S borders - enough to meet our energy needs for the next 110 years.
