

Delivering comfort and efficiency to you

Warm up with natural gas rebates

CenterPoint Energy's rebate program for heating systems for smaller buildings or supplemental heat can help you more affordably add new, high-efficiency natural gas equipment or upgrade your existing heating system with retrofit equipment.

Other heating systems

Equipment	Rebate	Efficiency rating/requirements
Forced-air furnaces	\$150/furnace	92% - 93.9% AFUE
Forced-air furnaces	\$300/furnace	94% - 95.9% AFUE
Forced-air furnaces	\$400/furnace	≥ 96% AFUE
Smart thermostat	\$50/thermostat	
Condensing unit heaters	\$300/heater; not to exceed 25% of equipment cost	≥ 88% thermal efficiency
Single package vertical unit	\$150/unit	≥ 90% efficiency
Infrared heaters	\$250/heater	Low-intensity tube-type
CO garage sensors	\$100/sensor	Retrofit only
Garage door hinge (spring-loaded)	\$15/hinge	
Garage air curtains	\$20/sq ft garage door area	
Demand control ventilation	\$100/sensor	Retrofit only
Electronic ignition hearth	\$75/unit	

More great energy-saving programs

Install a high-efficiency **natural gas water heater** with an ≥ 88 percent thermal efficiency and get a rebate of \$200 per 100,000 Btu input. Plus, we have rebates for **power vent and atmospheric tank water heaters** that are ≥ .64 UEF, ≥ .68 UEF and ≥ .80 UEF.

More great energy-saving rebates available for:

- Natural gas water heaters
- Boiler systems
- Boiler tune-ups
- Boiler system components — turbulators, burners, stack dampers, steam trap repair/replacement, reset and cut-out controls, pipe insulation, and linkageless controls

Natural Gas Energy Analysis

A Natural Gas Energy Analysis can help cut costs for businesses of any size.*

A certified energy auditor will visit the facility and:

- Inspect the building envelope and installed natural gas equipment
- Examine how the equipment is operating
- Identify opportunities to improve efficiency and potentially qualify for rebates

All analyses receive a detailed report with specific recommendations to help develop an energy-savings plan. Participants are also eligible for free direct-install natural gas-saving measures, including programmable thermostats, energy-efficient faucet aerators and showerheads, and weather stripping for exterior doors.

Analyses available

Type of analysis	Scope	Co-pay
Basic analysis*	Basic review of facility with high-level report, covering non-process loads. Most appropriate for small customers.	\$50
Comprehensive analysis**	Comprehensive review of facility with detailed technical report and calculations, covering non-process loads. Most appropriate for mid-to-large customers.	\$200
Ad hoc services*** for specific energy use analysis, such as steam trap surveys for a heating system and infrared scans	Custom analysis and/or additional services targeted to special customer needs and preferences, including infrared scans, steam trap surveys, and analysis of process loads.	Based on services provided

Note: The analysis does not include electric consumption, except as related to natural gas equipment, so it is not considered a comprehensive energy audit.

*Basic analysis is only available to customer with a Firm A or Firm B rate class.

**Customers with a Firm A and Firm B rate class may opt in to the comprehensive-level analysis.

***Ad-hoc services provides for specialty technical analysis of facilities, based on special needs of the customer, regardless of rate class. Customers with process loads, regardless of size will receive a custom analysis.

Terms and conditions apply.

Start saving today.

For more information on the Natural Gas Energy Analysis, call your account manager or our Business Customer Hotline at 612-321-4939 (877-809-3803). Or, visit us online at [CenterPointEnergy.com/EnergyAnalysis](https://www.CenterPointEnergy.com/EnergyAnalysis).

Program deadlines

- Program dates are Jan. 1 - Dec. 31
- Rebate applications must be postmarked by Dec. 31

Natural gas: reliable, efficient energy that's better for the environment

CenterPoint Energy is committed to providing low-cost, dependable and efficient energy that's getting cleaner every day.

Efficient: The natural gas delivery system is 91% efficient from production to customer.¹

Innovative: CenterPoint Energy is investing in the long-term solutions through legislation, renewables, carbon capture and recycling, green hydrogen and reduced operational emissions. We're committed to industry-leading carbon emissions goals, including net-zero direct emissions and a 20-30% reduction in customer end-use emissions, both by 2035. [CenterPointEnergy.com/Sustainability](https://www.CenterPointEnergy.com/Sustainability)

More reliable: Delivery of natural gas continues to provide safe and reliable service to customers with few interruptions.¹

More affordable: Over the past 10 years, natural gas prices have consistently been 2-3X lower than electricity prices. America's abundance of natural gas resources and CenterPoint Energy's extensive infrastructure base have historically satisfied domestic energy demands while keeping prices more affordable than other fuels.¹

Cleaner: Natural gas is a relatively clean-burning fossil fuel. Burning natural gas for energy results in fewer emissions of nearly all types of air pollutants and carbon dioxide (CO₂) than burning coal or petroleum products to produce an equal amount of energy.²

Abundant: More than 100 years of supply! With 3,368 trillion cubic feet of natural gas and 206 million miles of pipelines, natural gas is available where you need it, when you need it.¹
