

Helping **YOU** Save Energy

Identify and capture energy savings.

An audit of your natural gas steam distribution system can help increase efficiency by identifying steam traps in need of replacement or repair, providing immediate and long-term savings.

Steam Trap Audit Program

A steam trap failure can result in a substantial increase in natural gas consumption. An audit will help identify failed steam traps in need of replacement

How the Steam Trap Audit Program works:

- The program will pay for the steam trap audit at a rate of \$15/tested trap, up to 100% of the audit's cost, upon repair of all failed steam traps
- Customers are eligible to participate in the program every other year
- Available for heating or process customers
- Any trade ally can conduct the audit. The auditor should, however, have the proper diagnostic equipment (i.e., infrared and ultrasonic)

Audit funding is payable upon receipt of the following:

- Program application
- Audit log sheet
- Invoice for the audit
- Invoice for repaired traps
- Invoice for the repair labor (or estimate for internal labor)

Start saving today.

For more information about the Steam Trap Audit Program, contact your account manager or call 612-321-4330 (800-234-5800, ext. 4330).

Program deadlines

All required documentation must be received by Dec. 31 of the year the audit and steam traps repairs are completed.

Did you know?

In steam systems that have not been maintained for 3 to 5 years, between 15 to 30% of the installed steam traps may have failed, possibly wasting energy and money!
