

Helping YOU Save on Hot Water

Pour on energy savings with natural gas water heaters.

With CenterPoint Energy's water heater rebate program, you can efficiently heat water for employees and customers and do the right thing for the environment, all while saving energy and money. Investing in replacement or new equipment is easier with help from CenterPoint Energy's rebate programs.

Water heaters

Equipment	Rebate	Efficiency rating/UEF
Water heaters (condensing)	\$200/100,000 Btu input	≥88% efficiency
Tank water heaters (≤75,000 Btu, atmospheric)	\$75/unit	≥.64 UEF (medium usage bin ≤55 gallon) ≥.68 UEF (high usage bin ≤55 gallon)
Tank water heaters (≤75,000 Btu, power vent)	\$250/unit	≥.80 UEF (high usage bin >55 gallon)
Pipe insulation (domestic hot water)	\$2.50/lineal foot	Retrofit only

Note: For tank water heaters ≤75,000 Btu rebate to apply, the new equipment must be listed and Uniform Energy Factor (UEF) or thermal efficiency verified on the current Air-Conditioning, Heating, and Refrigeration Institute (AHRI) or ENERGY STAR® websites.

More great energy-saving programs

Boiler and boiler system components rebates are available for:

- Boiler tune-ups
- Hot water and low- and high-pressure steam boilers
- Process boilers, boiler/burner tune-ups, and stack economizers
- Boiler system components (including turbulators, burners, stack dampers, steam trap replacement/repair, reset and cut-out controls and linkageless controls)

Other heating systems Rebates are available for new and retrofit:

- Forced-air furnaces
- Infrared heaters
- Single package vertical units
- Condensing unit heaters
- Carbon monoxide garage sensors
- Demand control ventilation
- Commercial pipe insulation

Commercial laundry Rebates are available for:

- Ozone laundry
- Modulating clothes dryer

Natural Gas Energy Analysis

A Natural Gas Energy Analysis can help cut costs for businesses of any size.*
A certified energy auditor will visit the facility and:

- Inspect the building envelope and installed natural gas equipment
- Examine how the equipment is operating
- Identify opportunities to improve efficiency and potentially qualify for rebates

All analyses receive a detailed report with specific recommendations to help develop an energy-savings plan. Participants are also eligible for free direct-install natural gas-saving measures, including programmable thermostats, energy-efficient faucet aerators and showerheads, and weather stripping for exterior doors.

Ad hoc services such as steam trap surveys and infrared scans are also available. Visit [CenterPointEnergy.com/EnergyAnalysis](https://www.centerpointenergy.com/EnergyAnalysis) for details and to schedule your analysis.

**Basic analysis is only available to customer with a Firm A or Firm B rate class. Customers with a Firm A and Firm B rate class may opt into the comprehensive-level analysis.*

Program deadlines

- Program dates are Jan. 1 – Dec. 31
- Rebate applications must be received by Dec. 31 of the year equipment was installed

Use energy that's better for the environment and your budget.

Count on us to deliver what you need now and in the future: low-cost, dependable energy that's getting cleaner every day

Affordable

Natural gas costs substantially less to use than electricity, propane or heating oil. Natural gas prices are consistently 2-3X lower than electric prices.*

Reliable

During the polar vortex of January 2019, we supplied the equivalent of more than 20,000 megawatts of power – more than the total capacity of all electricity generation in the state.

Clean

As a primary fuel, natural gas can be used in its natural state rather than undergoing a conversion process at a power plant that creates emissions and wastes energy.**

Efficient

Over the last 25 years, we've partnered with our customers to reduce their carbon footprint by 12.2 million metric tons. That is equal to the annual energy use of 2.4 million homes in Minnesota.

Innovative

We plan to reduce our operational emissions by 70% by 2035. And we'll reduce natural gas emissions from residential and commercial use by 20-30% by 2040, from 2005 levels.

Domestic

About 93% of the natural gas used in the United States comes from within U.S. borders - enough to meet our energy needs for the next 110 years.
