

Helping you save on hot water

Pour on energy savings with natural gas water heaters

With CenterPoint Energy's water heater rebate program, you can efficiently heat water for employees and customers and do the right thing for the environment, all while saving energy and money. Investing in replacement or new equipment is easier with help from CenterPoint Energy's rebate programs.

Water heaters

Equipment	Rebate	Efficiency rating/UEF
Water heaters (condensing)	\$200/ 100,000 Btu input	≥ 88% efficiency
Tank water heaters (≤75,000 Btu, atmospheric)	\$75/unit	≥ .64 UEF (medium usage bin ≤55 gallon) ≥ .68 UEF (high usage bin ≤55 gallon)
Tank water heaters (≤75,000 Btu, power vent)	\$250/unit	≥ .80 UEF (high usage bin >55 gallon)
Pipe insulation (domestic hot water)	\$2.50/lineal foot	Retrofit only

Note: For tank water heaters ≤75,000 Btu rebate to apply, the new equipment must be listed and Uniform Energy Factor (UEF) or thermal efficiency verified on the current Air-Conditioning, Heating, and Refrigeration Institute (AHRI) or ENERGY STAR® websites. Terms and conditions apply.

More great energy-saving programs

Boiler and boiler system components rebates are available for:

- Boiler tune-ups
- Hot water and low- and high-pressure steam boilers
- Process boilers, boiler/burner tune-ups, and stack economizers
- Boiler system components (including turbulators, burners, stack dampers, steam trap replacement/repair, reset and cut-out controls and linkageless controls)

Other heating systems Rebates are available for new and retrofit:

- Forced-air furnaces
- Infrared heaters
- Single package vertical units
- Condensing unit heaters
- Carbon monoxide garage sensors
- Demand control ventilation
- Commercial pipe insulation

Commercial laundry Rebates are available for:

- Ozone laundry
- Modulating clothes dryer

Natural Gas Energy Analysis

A Natural Gas Energy Analysis can help cut costs for businesses of any size.* A certified energy auditor will visit the facility and:

- Inspect the building envelope and installed natural gas equipment
- Examine how the equipment is operating
- Identify opportunities to improve efficiency and potentially qualify for rebates

All analyses receive a detailed report with specific recommendations to help develop an energy-savings plan. Participants are also eligible for free direct-install natural gas-saving measures, including programmable thermostats, energy-efficient faucet aerators and showerheads, and weather stripping for exterior doors.

Ad hoc services such as steam trap surveys and infrared scans are also available. Visit [CenterPointEnergy.com/EnergyAnalysis](https://www.CenterPointEnergy.com/EnergyAnalysis) for details and to schedule your analysis.

**Basic analysis is only available to customer with a Firm A or Firm B rate class. Customers with a Firm A and Firm B rate class may opt into the comprehensive-level analysis.*

Program deadlines

- Program dates are Jan. 1-Dec. 31
- Rebate applications must be received by Dec. 31 of the year equipment was installed

Natural gas: reliable, efficient energy that's better for the environment

CenterPoint Energy is committed to providing low-cost, dependable and efficient energy that's getting cleaner every day.

Efficient: The natural gas delivery system is 91% efficient from production to customer.¹

Innovative: CenterPoint Energy is investing in the long-term solutions through legislation, renewables, carbon capture and recycling, green hydrogen and reduced operational emissions. We're committed to industry-leading carbon emissions goals, including net-zero direct emissions and a 20-30% reduction in customer end-use emissions, both by 2035. [CenterPointEnergy.com/Sustainability](https://www.CenterPointEnergy.com/Sustainability)

More reliable: Delivery of natural gas continues to provide safe and reliable service to customers with few interruptions.²

More affordable: Over the past 10 years, natural gas prices have consistently been 2-3X lower than electricity prices. America's abundance of natural gas resources and CenterPoint Energy's extensive infrastructure base have historically satisfied domestic energy demands while keeping prices more affordable than other fuels.¹

Cleaner: Natural gas is a relatively clean-burning fossil fuel. Burning natural gas for energy results in fewer emissions of nearly all types of air pollutants and carbon dioxide (CO2) than burning coal or petroleum products to produce an equal amount of energy.²

Abundant: More than 100 years of supply! With 3,368 trillion cubic feet of natural gas and 206 million miles of pipelines, natural gas is available where you need it, when you need it.¹
