Aerial Photography: Provided by Google
Date: 2022
Accuracy for Google imagery is approximately ±10 feet.
Some data layers including tract boundaries, roads, and oil/gas pipelines obtained from third-party sources may be inaccurate to varying degrees. These data have not been corrected in all locations and should be used as a general guide to feature locations only. Digitization of proposed transmission line segments was performed based on aerial interpretation of these features.
Some legend symbols are enlarged for easier identification.
Some features are exaggerated to better identify paralleling opportunities.
