

Expand your cellular network through installation on our transmission structures

About us

CenterPoint Energy owns and operates over **1,610 miles** of transmission right of way including more than **30,000 transmission towers** and **500 substations** available for your use. Since our infrastructure is ready to move in, you can expect faster installations to get you up and running.

Our value to you

As your trusted provider, we offer a turnkey solution to your cellular installation needs. From repair and maintenance to replacement and modifications, CenterPoint does the work so you don't have to.

Other benefits include:

Engineering, site walks, mapping and access to private roads

We can build to suit your needs*

1:1 consultative relationship

No building or electric permits required when installed by us**

**Custom builds are available for an additional cost and extended time frame. No permits needed if the building is done on CenterPoint property, with the exception of League City, TX.*

***Where CenterPoint is the electric service provider.*

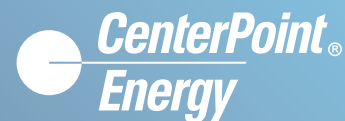

Ready to get started?
