

Lower your energy consumption and operating expenses by participating in our Indiana electric business Custom Program.

The electric business Custom Program provides incentives to CenterPoint Energy's Indiana business customers for implementing energy-efficient, cost-saving technologies in their electric projects. Whether you're installing new lighting controls or upgrading air control systems, these incentives can help reduce your initial investment and lower your facility's ongoing operating costs.

Eligibility

CenterPoint's Indiana commercial electric service customers that have not opted out of energy efficiency programs are eligible for Business Custom Program rebates. **Terms and conditions apply.**

Examples of qualifying electric projects

Here are some examples of energy-saving projects that may qualify for a Business Custom Program incentive:

- Electric heating, ventilation and air conditioning (HVAC) projects
- Refrigeration upgrades
- Outside air control projects
- Enhancements to air distribution and zoning systems

Applications for custom rebates MUST be preapproved by CenterPoint prior to purchasing or installing equipment.

We are here for you!

Visit [CenterPointEnergy.com/INBusinessRebates](https://www.CenterPointEnergy.com/INBusinessRebates) to learn more about CenterPoint's rebate incentive program and to download a Business Custom Program application. If you have questions about the program or need assistance with the application, contact us directly via email at IndianaBizPrograms@CenterPointEnergy.com or call 855-220-1399.

Current program incentive

The rebate incentive is \$0.14 per kilowatt-hour (kWh) saved on projects with a simple payback greater than one year. Project incentives are capped at 50% of costs or \$300,000. See the Business Custom Program application for more details.

How the program works

Pre-installation

- Identify a possible energy-efficiency project at your facility.
- Download, complete and submit a Business Custom Program application, along with a project summary, estimated cost and proposed energy savings. Your application and supporting documentation are reviewed to determine rebate eligibility. Do not purchase equipment prior to project approval.

Installation

- Once your application is reviewed and approved, you will receive a project pre-approval letter. You can now purchase equipment and begin work on your project.
- If your project will not be completed within the pre-approved timeframe, contact us with your new estimated completion date to request an extension.

Post-installation

- When your project is finished, submit an itemized invoice, your project installation notice (PIN) and any final documentation. A program staff member may contact you to conduct a site visit to collect additional information, if need be.
- After the final review is complete, a rebate check will be mailed to you.

Rebates for natural gas-saving projects

CenterPoint Energy of Indiana business customers with natural gas service under rates 120, 125, 220 or 225 can qualify for rebates on energy-saving custom projects. The Natural Gas Business Custom Program offers an incentive of up to \$100,000 on qualifying projects.

Energy-saving project snapshots

Heritage Hills High School

Installation of an indoor swimming pool blanket to reduce heat loss and energy costs during unoccupied hours:

- Total investment: \$60,000
- Energy savings: 92,983 kWh
- Annual bill savings: \$13,657
- CenterPoint Energy custom incentive: \$11,626
- Project payback after incentive: 3.4 years

Old National Bank

Reroute building duct work and upgrade heating controls to reduce energy use, cut costs and take advantage of free cooling when outside air temperatures are lower than 50° F.

- Total facility size: 100,000 sq. ft.
- Total investment: \$215,000
- Energy savings: 279,058 kWh
- Annual bill savings: \$21,318
- CenterPoint Energy custom incentive: \$33,487
- Project payback after incentive: 8.4 years
