

# 2026 Business Prescriptive Program Measure Selection Form: Miscellaneous

for Indiana Businesses with CenterPoint Energy Electric Service

- Complete this Measure Selection Form to apply for an incentive for the installation of eligible “Miscellaneous” measures **installed by December 31, 2026.**
- All technical data sheets for installed equipment must be included with your submission.
- If technical data (EER, Efficiency, etc.) requested in the form is unavailable, please contact your product supplier. Incomplete forms will not be processed.
- All installed measures must be new. No refurbished measures will be accepted.
- **For new construction or major renovation installations:**
  - A baseline equipment specification must be provided in lieu of existing equipment information. The baseline equipment must meet any and all applicable building codes as they refer to efficiency levels and should meet ASHRAE 90.1 standards.
  - Rebates are only available for equipment which exceeds ASHRAE 90.1 standards.
  - The following measures must exceed Federal Standards: Water Heaters.

**Important**

This Measure Selection Form and technical data sheets should be submitted in conjunction with the **Business Prescriptive Program Application**

**Applications for rebates in excess of \$20,000 per facility per year must be preapproved by CenterPoint Energy prior to purchasing or installing equipment.**

## Need Help?

For assistance completing this Measure Selection Form, call 855-220-1399 to speak with an Energy Efficiency Advisor.

## Project & Facility Information (Required Information)

**Project Type**  Retrofit Existing Equipment  Replace Failed Equipment  New Load  New Construction or Major Renovation

### Product Information

#### Variable Speed Air Compressor or Vacuum Pump

Ref ID	Equipment Type	Unit	Annual Operating Hours of Compressor	Compressor Nameplate Efficiency	Nominal Horsepower (hp)*	Quantity	Incentive (Per Unit)	Total Incentive
MISC-08	Air Compressor or Vacuum Pump with Variable Frequency Drive	hp					\$75	\$
<ul style="list-style-type: none"> <li>• Minimum operating hours of 2,000 hrs/yr.</li> <li>• Limit of one VFD unit per compressed air system.</li> <li>• VFD retrofits on existing units are not eligible.</li> </ul>				<ul style="list-style-type: none"> <li>• Units purchased or installed for backup or redundant systems do not qualify.</li> <li>• The rated horsepower of the unit must be ≤ 400 hp.</li> <li>• Units larger than 400 hp or multiple unit systems may be eligible for custom incentives.</li> </ul>				

#### Compressed Air Leak Study and Repair

Ref ID	Equipment Type	Unit	Annual Operating Hours of Compressor	Quantity	Incentive (Per hp)	Total Incentive
MISC-12	Compressed Air Leak Study and Repair	hp			\$12	\$
<ul style="list-style-type: none"> <li>• This incentive is only available once per year, per customer site.</li> <li>• The incentive is for non-back-up compressors only.</li> <li>• The total system must be ≥ 50 hp.</li> <li>• The compressed air system must operate a minimum of 2,000 annual hours.</li> <li>• Must repair a minimum of 60% of identified leaks during the assessment.</li> <li>• Calculated incentive (\$12/hp) may be capped at 100% of study and repair costs or \$10,000, whichever is less.</li> </ul>			<p>For Program-provided studies only:</p> <ul style="list-style-type: none"> <li>• The signed Prescriptive Application and this Measure Selection Form must be submitted to the Program to be considered for this service.</li> </ul> <p>For studies conducted by the customer or a third party:</p> <ul style="list-style-type: none"> <li>• Applicant must submit separate Compressed Air Leak Log Sheet with application.</li> <li>• Log sheet may be downloaded at <a href="https://midwest.centerpointenergy.com/assets/downloads/in-business/in-business-logsheet-compressedairleak.pdf">https://midwest.centerpointenergy.com/assets/downloads/in-business/in-business-logsheet-compressedairleak.pdf</a></li> <li>• Leaks must be repaired before application is submitted.</li> <li>• Customers must leave leak tags in place for at least four months after application is submitted to allow the program to verify leak repair if needed.</li> </ul>			

## Product Information (cont.)

### No-Loss Condensate Drains

Ref ID	Equipment Type	Unit	Quantity	Incentive (Per Unit)	Total Incentive
MISC-13	Compressed Air No-Loss Condensate Drain	Drain		\$200	\$

- Replacements for existing no-loss drains are ineligible.
- Rebate is for replacement of standard condensate drains (open valve, timer, or both); manual drain valves are ineligible if not open regularly or continuously.

### Compressed Air Nozzles

Ref ID	Equipment Type	Unit	Annual Operating Hours of Compressor*				Quantity	Incentive (Per Unit)	Total Incentive
			1/8"	1/4"	5/16"	1/2"			
MISC-06	Compressed Air Engineered Nozzle	Nozzle					\$40	\$	

- Engineered nozzles must replace standard open blow-off nozzles only.
- System must operate at least 2,000 annual hours and have a system pressure of ≥ 80 psig.

### Reduce Compressed Air Setpoint

Ref ID	Equipment Type	Unit	Compressor Make and Model	Annual Operating Hours of Compressor	hp	Δ psig	Incentive (Per Unit)	Total Incentive
MISC-14	Reduce Compressed Air Setpoint	hp x Δ psig					\$2	\$

- The incentive is for non-back-up compressors only.
- All non-back-up compressor makes and models must be provided.
- Compressor setpoint must be decreased for a minimum period of 30 days prior to applying for incentive.
- Example of incentive calculation: The incentive for a 40 hp compressor reducing from 120 psig to 111 psig would be 40 hp x (120 psig - 111 psig) x \$2 = \$720 total incentive.

### Refrigeration Tune-Up

Refrigeration tune-ups include cleaning/inspecting condenser and evaporator coils, cleaning the drain pan, inspecting/cleaning fans, screens, grills, filters, and drier cores, checking operation and optimization of sub-cooling and superheat temperatures, heat reclaimers, and defrost heaters, tightening all line voltage connections, inspecting/replacing relays and capacitors, as needed, and adding/removing refrigerant charge, as needed.

Ref ID	Equipment Type	Unit	Unit Capacity (kBtu/h = MBH = 1,000 Btu/h)	Quantity	Incentive (Per Unit)	Total Incentive
MISC-15	Remote Condensing Unit Tune-Up	kBtu/h	Medium Temperature Low Temperature	Medium Temperature Low Temperature	\$2.50	\$
MISC-16	Self-Contained Unit Tune-Up	Each		Medium Temperature Low Temperature	\$25	\$

- Rebate is available once per year for each unit.
- Rebate not to exceed tune-up cost.
- New construction and new load projects are ineligible for rebate.

### Water Heater

This measure does not apply for replacement of natural gas-fired water heaters.

Ref ID	Equipment Type	Equipment Heating Capacity Requirement	Unit	Heating Capacity (MBH)	Rated Efficiency (COP)
WIN-01	Heat Pump Water Heater	≥10 MBH	Each		
Volume of Water Tank (Gallons)	Hot Water Temperature Setpoint ° F	Quantity	Incentive (Each)	Total Incentive	
			\$500	\$	

## Product Information (cont.)

### Industrial Process Variable Frequency Drive

This rebate applies to a variable frequency drive installed on an industrial process pump or motor up to 100 hp. VFDs installed in HVAC applications should be submitted using the Heating & Cooling Measure Selection Form; those larger than 100 hp should be submitted for preapproval through CenterPoint Energy's Custom Program prior to purchase.

Ref ID	Equipment Type	Unit	hp per Motor (≤ 100 hp)	Motor Quantity	Annual Motor Operational Hours	Average Percent Motor Speed (≤ 90%)	Total hp	Incentive (Per hp)	Total Incentive
MISC-17	Industrial Process VFD	hp						\$60	\$

- Pump or motor must operate at least 2,000 hours per year.
- Pump or motor must operate at reduced speed, not to exceed an average of 90% annually.

### Electric Steam Trap Replacement

Ref ID	Equipment Type	Rebate	Unit	Pressure (psig)	Quantity	Total Incentive
MISC-18	Electric Steam Trap	\$250	Each			

- This incentive is only available for steam systems with an electric boiler. Gas boiler systems should apply using the Natural Gas Measure Selection Form.
- Steam Trap Service Log Sheet must be completed and submitted with application. (Download at <https://midwest.centerpointenergy.com/assets/downloads/in-business/in-business-logsheet-steamtraps.pdf>)
- The rebate is only available for the replacement or rebuilding of steam traps that are leaking steam. Traps that are plugged are not eligible.
- Each steam trap is only eligible for rebate once per year.
- Rebate not to exceed the service cost.

### Barrel Wrap Insulation

Ref ID	Equipment Type	Unit	Annual Operating Hours	Operating /Load Temperature
MISC-09	Barrel Wrap for Injection Molding Machine	ft <sup>2</sup>		° F
Insulation Thickness (in)	L Barrel Length (ft)	D Barrel Diameter (ft)	Incentive (Per ft <sup>2</sup> )	Total Incentive L x D x 3.14159 x \$30
			\$30	\$

- Barrel Wraps must have a minimum 1" thick ceramic fiber or mat.

### Window Film

Film must block at least 60% of solar heat, and have a Solar Heat Gain Coefficient (SHGC) < 0.4.

Ref ID	Equipment Type	Unit	Glazing Surface Area (exclude Frame Area)	Incentive (Per Unit)	Total Incentive
WIN-01	Window Film	ft <sup>2</sup>	ft <sup>2</sup>	\$1	\$

### Low Flow Showerheads

Ref ID	Equipment Type	Water Heater Type	Unit	Quantity	Incentive (Per Unit)	Total Incentive
MISC-11	Low Flow Showerhead	<input type="checkbox"/> Gas <input type="checkbox"/> Electric	Each		\$5	

- Showerhead flow rate must be 1.5 gallons per minute or less.
- Water heater must be electric. For gas water heaters, please use the Gas Measure Selection Form.
