Dear <<Name>>,

You are invited to attend a public meeting hosted by CenterPoint Energy Houston Electric, LLC (“CenterPoint Energy”) to discuss and share information on potential routes for a proposed 138 kilovolt (kV) electric transmission line in Montgomery County known as the 138 kV Mill Creek Substation project. As a landowner near the proposed electric transmission line segments, we value your input, feedback, questions, and comments and this is an opportunity for CenterPoint Energy to visit with you one-on-one about the process and project.

The date, time and location for the public meeting is:

**Thursday December 15, 2022**
Tomball Community Center
221 Market St.
Tomball, TX 77375
5:00 p.m. – 8:00 p.m.

The proposed transmission line is required to connect a new distribution substation used to support the load growth in the Tomball-Magnolia area. The proposed construction includes a 138 kV double-circuit transmission line, located along a yet-to-be-determined route, connecting an existing transmission line to the new distribution substation in a yet-to-be determined location near Hardin Store Road and Dobbin-Huffsmith Road.

All of the proposed preliminary segments displayed on the enclosed map are under consideration at this time; however, not all of the segments will be constructed. The Public Utility Commission of Texas will determine the final route in a proceeding when it considers CenterPoint Energy’s filing of an Application for a Certificate of Convenience and Necessity.

Information stations with subject matter experts from CenterPoint Energy and environmental specialists from both CenterPoint Energy and a consulting and engineering firm under contract with CenterPoint Energy, TRC, will be available to share information about the need for the transmission project, the type of structures proposed for the new transmission line, construction methods to be used, and transmission right-of-way requirements. CenterPoint Energy will provide a questionnaire for landowners to complete regarding their preferences and to provide comments. Refreshments will be provided.

For more information about the proposed project, the public meetings, and a copy of the questionnaire, please visit our website at [http://www.centerpointenergy.com/millcreekesubstation](http://www.centerpointenergy.com/millcreekesubstation), the website will be available on December 12; or contact the 138 kV Mill Creek Substation project team at 713-207-4985 or email at millcreekesubstation@centerpointenergy.com.

Sincerely,

Daniela Hammons
Director; Policy and Compliance
