

16.00 EXCESS FLOW VALVE

In accordance with Federal Pipeline Safety Regulations 49 CFR 192.383, the Company will install an excess flow valve on an existing service line at the customer's request at a mutually agreeable date. At the time of the customer's request CenterPoint Energy will provide the customer with a detailed explanation of the estimated installation costs identifying specific line items and the per hour rates that the customer would be charged. The actual cost of the installation excluding the cost of the excess flow valve and any other physical property necessary to install the excess flow valve will be assessed to the customer.
