

NATURAL GAS THE NATURAL CHOICE FOR YOUR NEW HOME

A HOME WITH ALL NATURAL GAS APPLIANCES PROVIDES:

1. Greater energy efficiency and cost savings
2. A more comfortable lifestyle
3. A safe and reliable choice for your household energy use

WATER HEATER BENEFITS

- Natural gas water heaters recover twice as fast so they have more hot water available than electric models.
- Natural gas is significantly cleaner than electricity, with half the carbon footprint.

COOKING BENEFITS

- 96% of professional chefs prefer natural gas.
- Precision temperature control and even heat distribution.
- Natural gas ranges can last six years longer than electric.

HEATING BENEFITS

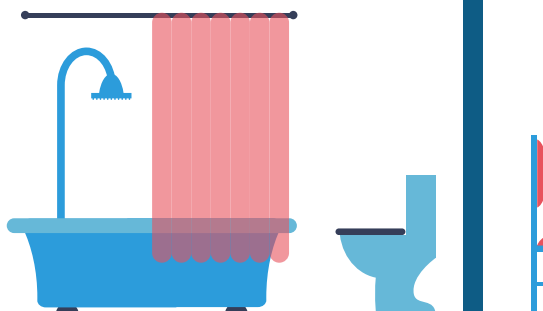

- Heat from a natural gas furnace feels warm and cozy, as the air delivered is 25 F warmer than that delivered from an electric heat pump.
- On average, a natural gas furnace emits half the carbon and nitrous oxide emissions compared to an electric heating system.

Operating costs are typically about

50%

LOWER
than electric.

Operating costs are up to

30%

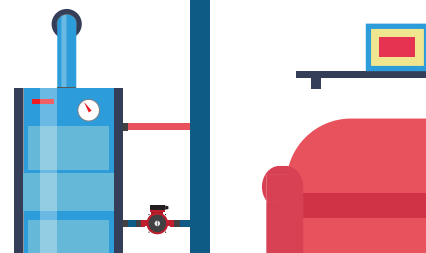

LOWER THAN
electric.

Operating costs for a natural gas heating system are on average

54%

LESS
than an electric heating system.

CLOTHES DRYING BENEFITS

- Natural gas dryers heat faster - dry two loads for the same cost as one with an electric dryer.
- Shorter drying times helps preserve the life of your clothes.
