## **NOTICE: CenterPoint Energy to complete Dorman Avenue Area project by late May 2020**

***Text-to-subscribe for updates regarding this construction project by sending  
CNP DORMAN to 468311***

Dear Property Owner,

At CenterPoint Energy, we are committed to providing timely and relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

**Due to coronavirus concerns, CenterPoint Energy is delaying meter work that requires entering customer homes or disrupting customer gas service until further notice.**

***Project Description:*** In 2019, crews from Michels Corporation, CenterPoint Energy's authorized contractor, replaced most of CenterPoint Energy's project's natural gas mains. In 2020, the crews will return to finish the remaining natural gas main installations, connect natural gas service lines to the new mains, and move any inside residential meters to the outside of homes. (Please view our map on the opposite page.)

***What to expect in 2020:*** Beginning on Wednesday, March 11, the crews will replace the project's remaining natural gas mains. This work will last for several weeks. From late March to mid-May, the crews will connect the service lines to the new mains. Crews from Q3 Contracting, CenterPoint Energy's authorized contractor, will permanently restore the areas affected by Michels Corporation's work outside the limits of the City of Minneapolis's Street Resurfacing Program.

***Connecting service lines to the new mains:*** Due to coronavirus concerns, CenterPoint Energy is delaying work that requires entering customer homes, such as moving gas meters outside. Gas service will not be interrupted. Crews will continue to replace service lines. A new service line will be replaced from the new main up to the resident's home. The meter, whether it is currently inside or outside, will not be disrupted. Crews may have to dig in the ground on your property in the utility easement and next to your home to complete the task of service line replacement. At a later date, the crews will come back to add the new meter onto the service line.

***Traffic impacts:*** Work will occur in segments rather than all at once. Although there won't be any major road closures, the crews will work on one side of the road at a time. Lane and parking restrictions are anticipated in areas where active construction is occurring and are necessary to keep both the public and construction personnel safe. Local access will be maintained.

We appreciate your patience as we continue to upgrade our natural gas system. CenterPoint Energy has provided safe, clean and efficient natural gas service to Minnesota communities for more than 145 years. We are proud of this record and strive to improve it by educating the public about the benefits of natural gas at [CenterPointEnergy.com/BeSafe](https://www.centerpointenergy.com/BeSafe). We appreciate your business and look forward to continuing to serve you.
