CenterPoint Energy to replace natural gas lines in Anoka

Dear Property Owner,

At CenterPoint Energy, we are committed to providing relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

What will CenterPoint Energy do?

From late July to late summer or fall 2021, CenterPoint Energy's authorized contractors will work in Anoka along the following roads:

- Highway 10 and the south frontage road between Anoka Technical College and Church Street
- Verndale Avenue, Brighton Street, and Oak Street north of Highway 10
- Fairoak Avenue and Church Street south of Highway 10

While Michels Corporation will replace natural gas mains, connect the natural gas service lines to the new mains, and move any inside residential meters outside, Q3 Contracting will restore the areas affected by Michels Corporation's work.

For most of the project's duration, parking and/or lane closures will occur. Flaggers may be on site directing traffic. On some streets, sidewalk closures will alternate to maintain pedestrian access. For a few blocks at a time between Cutters Grove Avenue and Fairoak Avenue, the crews will close one lane of Highway 10 heading southeast and will turn the road into a one-way street heading northwest. The cross streets and parking lot entrances along this road will remain open. Detour signs will lead drivers to Cutters Grove Avenue.

What is CenterPoint Energy's COVID-19 protocol?

The construction crews and personnel will continue to use the Covid-19 Customer Permission Flyer, which requests customer permission prior to entering homes. Personnel, contractors and CenterPoint Energy employees will continue to practice CDC guidelines regarding social distancing, sanitary practices and wearing face masks when entering customer homes.

What if I have an inside gas meter?

The customer will receive a CenterPoint Energy postcard in the mail typically within one or two weeks prior to the day when the Michels Corporation crews will perform the work. The crews will have CenterPoint Energy-authorized photo IDs stating that they are employees of Michels Corporation. After the customer receives the postcard, the foreman will arrive at the customer's house to schedule an appointment that typically meets with the customer's schedule. If the customer isn't home when they arrive, they will leave a door tag with their contact information to schedule an appointment.

Customers are advised to set aside a two- to four-hour time frame for the inside-to-outside gas meter move. They are also advised to mark their privately-installed utilities such as dog fences or sprinklers. Marking can be accomplished with tools such as spray paint or utility flags.

The foreman will access the natural gas meter inside the house, move the meter outside, and relight the natural gas appliance pilot lights after the new meter has been relocated. Customers with outside meters will be notified prior to the replacement or connection of the service lines to the new mains.

How can I contact CenterPoint Energy?

For more information or to sign up for updates, please visit CenterPointEnergy.com/Construction, click on “**Project Sites**” and “**Anoka.**” Look for future communications via mailings or a door tag left by the CenterPoint Energy inspector. We appreciate your patience as we continue to upgrade our natural gas system, ensuring system reliability for years to come.
