CenterPoint Energy to replace natural gas lines in Belle Plaine

Dear Property Owner,

At CenterPoint Energy, we are committed to providing relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

What will CenterPoint Energy do?

Beginning in early August and lasting into fall 2021, CenterPoint Energy's authorized contractors will work in Belle Plaine along the following streets:

- The alley between Market, Willow, Prairie and Main Streets
- Willow Street S. between Main and Park Streets
- Meridian Street S. between Main and Park Streets
- Chestnut Street S. between Main and South Streets (Commerce Drive)
- Cedar Street S. between Church and Raven Streets
- Walnut Street S. between Main and Raven Streets
- Prairie Street between Willow and Walnut Streets S.
- Park Street between Market and Meridian Streets S.
- Raven Street between Meridian and Walnut Streets
- Walnut Street between Main and Raven Streets
- Elm, Linden and Ash Streets S. between Prairie Street and Commerce Drive

While Michels Corporation will replace the natural gas mains, connect the natural gas service lines to the new mains, and move any inside residential meters outside, Q3 Contracting will restore the areas affected by Michels Corporation's work. For most of the project's duration, lane, parking and sidewalk closures will occur. The crews will close the alleys one at a time when the crews put the existing natural gas mains out of service.

What is CenterPoint Energy's COVID-19 protocol?

The construction crews and personnel will continue to use the Covid-19 Customer Permission Flyer, which requests customer permission prior to entering homes. Personnel, contractors and CenterPoint Energy employees will continue to practice CDC guidelines regarding social distancing, sanitary practices and wearing face masks when entering customer homes.

What if I have an inside gas meter?

The customer will receive a CenterPoint Energy postcard in the mail typically within one or two weeks prior to the day when the Michels Corporation crews will perform the work. The crews will have CenterPoint Energy-authorized photo IDs stating that they are employees of Michels Corporation.

After the customer receives the postcard, the foreman will arrive at the customer's house to schedule an appointment that typically meets with the customer's schedule. If the customer isn't home when they arrive, they will leave a door tag with their contact information to schedule an appointment.

Customers are advised to set aside a two- to four-hour time frame for the inside-to-outside gas meter move. They are also advised to mark their privately-installed utilities such as dog fences or sprinklers. Marking can be accomplished with tools such as spray paint or utility flags. The foreman will access the natural gas meter inside the house, move the meter outside, and relight the natural gas appliance pilot lights after the new meter has been relocated. Customers with outside meters will be notified prior to the replacement or connection of the service lines to the new mains.

How can I contact CenterPoint Energy?

For more information or to sign up for updates, please visit [CenterPointEnergy.com/Construction](https://www.CenterPointEnergy.com/Construction), click on **"Project Sites"** and **"Belle Plaine."** Look for future communications via mailings or a door tag left by the CenterPoint Energy inspector. We appreciate your patience as we continue to upgrade our natural gas system, ensuring system reliability for years to come.
