CenterPoint Energy to replace natural gas lines on Buck Hill Road from late spring to fall 2021

Dear Property Owner,

At CenterPoint Energy, we are committed to providing relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

From mid-May to fall 2021, CenterPoint Energy's authorized contractors will work in Burnsville along Buck Hill Road from the Burnsville Mall to 158th Street W. While Michels Corporation will replace two natural gas mains, Q3 Contracting will restore the areas affected by Michels Corporation's work.

On May 10, the crews will begin replacing the first main from the entrance to Buck Hill to 158th Street W. They will also connect two natural gas service lines to the new main. During this time, two-way traffic will be maintained on Buck Hill Road. The sidewalk will be closed. Entrances to Buck Hill and 158th Street W. will remain open.

From late May to fall, the crews will return to replace the second main from the Burnsville Mall to 158th Street W. During this time, few blocks will be closed at a time for a few weeks at a time. When the crews cross an intersection, each crossing will take approx. a few business days. At the end of the project, the crews will return to the north and south ends of the job to connect the new main to the existing intersecting ones.

The inspectors will work with residents and businesses on maintaining access. These restrictions necessary to keep both the public and construction personnel safe.

For more information or to sign up for updates, please visit [CenterPointEnergy.com/Construction](https://www.CenterPointEnergy.com/Construction), click on "Project Sites" and "Burnsville." Look for future communications via mailings or a door tag left by the CenterPoint Energy inspector.

We appreciate your patience as we continue to upgrade our natural gas system, ensuring system reliability for years to come.
