## CenterPoint Energy to replace natural gas lines on 28<sup>th</sup> St. W.

Dear Property Owner,

At CenterPoint Energy, we are committed to providing relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

### ***What will CenterPoint Energy do?***

Earlier this spring, CenterPoint Energy replaced natural gas lines along 26<sup>th</sup> Street W. between Dupont and Lyndale Avenues. (See the map on the opposite page.) From late June to mid-summer 2021, CenterPoint Energy's authorized contractors will work in Minneapolis along 28th Street W. between Hennepin and Lyndale Avenues S. While Michels Corporation will replace the natural gas main, connect the natural gas service lines to the new main, and move any inside residential meters outside, Q3 Contracting will restore the areas affected by Michels Corporation's work outside the limits of the City of Minneapolis's Street Resurfacing Program.

Parking will be restricted on 28th Street W. Sidewalk closures will alternate as needed. Two-way traffic will be maintained heading northbound and southbound on the cross streets. There will be a lane shift on Hennepin Avenue at 28th Street W.

### ***What is CenterPoint Energy's COVID-19 protocol?***

The construction crews and personnel will continue to use the Covid-19 Customer Permission Flyer, which requests customer permission prior to entering homes. Personnel, contractors and CenterPoint Energy employees will continue to practice CDC guidelines regarding social distancing, sanitary practices and wearing face masks when entering customer homes.

### ***What if I have an inside gas meter?***

The customer will receive a CenterPoint Energy postcard in the mail typically within one or two weeks prior to the day when the Michels Corporation crews will perform the work. The crews will have CenterPoint Energy-authorized photo IDs stating that they are employees of Michels Corporation.

After the customer receives the postcard, the foreman will arrive at the customer's house to schedule an appointment that typically meets with the customer's schedule. If the customer isn't home when they arrive, they will leave a door tag with their contact information to schedule an appointment.

(continued from opposite page)

Customers are advised to set aside a two- to four-hour time frame for the inside-to-outside gas meter move. They are also advised to mark their privately-installed utilities such as dog fences or sprinklers. Marking can be accomplished with tools such as spray paint or utility flags. The foreman will access the natural gas meter inside the house, move the meter outside, and relight the natural gas appliance pilot lights after the new meter has been relocated. Customers with outside meters will be notified prior to the replacement or connection of the service lines to the new mains.

### **How can I contact CenterPoint Energy?**

For more information or to sign up for updates, please visit [CenterPointEnergy.com/Construction](https://www.CenterPointEnergy.com/Construction), click on “Project Sites” and “Minneapolis.” Look for future communications via mailings or a door tag left by the CenterPoint Energy inspector. We appreciate your patience as we continue to upgrade our natural gas system, ensuring system reliability for years to come.
