CenterPoint Energy to replace natural gas lines in Jordan Area

Dear Property Owner,

At CenterPoint Energy, we are committed to providing relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

What will CenterPoint Energy do?

Beginning in the week of May 31 and lasting into summer 2021, CenterPoint Energy's authorized contractors will work in Minneapolis along the following streets: 25th Ave. N. between Irving and Dupont Avenues N.; Aldrich Ave. N. & 25th Ave. N.; and Irving, Humboldt, Girard and Aldrich Avenues N. between 25th and 26th Avenues N. While Michels Corporation will replace two natural gas mains, connect the natural gas service lines to the first of the new mains, and move any inside residential meters outside, Q3 Contracting will restore the areas affected by Michels Corporation's work.

Full closures of the affected roads will occur for approx. two blocks at a time. Detour routes will lead through traffic to the next block or two over. Sidewalk closures will alternate as needed to maintain pedestrian access. Parking will be restricted on both sides of the road within the closures. The crews will work with residents on maintaining access.

What is CenterPoint Energy's COVID-19 policy?

According to the Governor of Minnesota's order, gas main replacement is an essential work function. This allows for the modernization of related gas facilities. The gas main work requires excavations in various locations in the right-of-way (front yard) to facilitate the installation work.

As social distancing practices and proper use of PPE, face masks and gloves have become normalized and as customers are willing to allow properly protected personnel into their homes to complete required work to modernize gas facilities, which is essential work, CenterPoint Energy authorized contractors will enter customer homes to complete work only with customer permission.

The purpose of this letter is to advise that with customer permission, crews will now enter homes to complete necessary gas meter work. If you choose not to allow crews to enter your home, gas service will not be interrupted, and we will reschedule for a time better suited to concerns you may have. Crews will continue to replace service lines. Crews may have to dig in the ground on your property in the utility easement and next to your home to complete the task of service line replacement.
