## CenterPoint Energy to replace natural gas lines in Plymouth this spring

Dear Property Owner,

At CenterPoint Energy, we are committed to providing relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

### ***What will CenterPoint Energy do?***

From the week of April 12 to late spring or early summer 2021, CenterPoint Energy's authorized contractors will work in Plymouth along the following streets: Garland Lane N., Fountain Lane N., 17<sup>th</sup> Ave. N., 13<sup>th</sup> Ave. N., 14<sup>th</sup> Ave. N., Black Oaks Lane N., Black Oaks Ct. N., Zanzibar Lane N., and Weston Lane N. While Michels Corporation will replace the natural gas main, connect the natural gas service lines to the new main, and move any inside residential meters outside, Q3 Contracting will restore the areas affected by Michels Corporation's work at no cost to the customer.

### ***What will the traffic impacts be?***

For most of the project's duration, lane and parking closures will occur in areas of active construction. For limited durations, the crews will close the entrances into Garland Lane N., Fountain Lane N., and Yuma Lane N. along County Road 6. Detour signs will lead drivers to the next block over.

### ***What is CenterPoint Energy's COVID-19 policy?***

According to the Governor of Minnesota's order, gas main replacement is an essential work function. This allows for the modernization of related gas facilities. The gas main work requires excavations in various locations in the right-of-way (front yard) to facilitate the installation work.

As social distancing practices and proper use of PPE, face masks and gloves have become normalized and as customers are willing to allow properly protected personnel into their homes to complete required work to modernize gas facilities, which is essential work, CenterPoint Energy authorized contractors will enter customer homes to complete work only with customer permission.

The purpose of this letter is to advise that with customer permission, crews will now enter homes to complete necessary gas meter work. If you choose not to allow crews to enter your home, gas service will not be interrupted, and we will reschedule for a time better suited to concerns you may have. Crews will continue to replace service lines. Crews may have to dig in the ground on your property in the utility easement and next to your home to complete the task of service line replacement.
