Dear Property Owner,

At CenterPoint Energy, we are committed to providing timely and relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

Due to coronavirus concerns, since early March CenterPoint Energy has delayed meter work that requires entering customer homes or disrupting customer gas service.

As social distancing practices and proper use of PPE, face masks and gloves have become normalized and as customers are willing to allow properly protected personnel into their homes to complete required work to modernize gas facilities, which is essential work, CenterPoint Energy authorized contractors will enter customer homes to complete work only with customer permission.

Project Description: CenterPoint Energy's project is anticipated to last from March 30 to late summer or early fall 2020 with work from CenterPoint Energy's authorized contractors. It will happen along the project's streets between Holborn and Josephine Avenues and between 62nd and 66th Streets West. Crews from Michels Corporation are finishing the natural gas main installation. Within the week of May 4, the crews will begin connecting natural gas service lines to the new mains. Crews from Q3 Contracting will restore the areas affected by Michels Corporation's work outside the limits of the city's project.

Installing replacement gas mains: Michels Corporation will be installing the replacement gas main on this project. According to the Governor of Minnesota's order, gas main replacement is an essential work function. This allows for the modernization of related gas facilities. The gas main work requires excavations in various locations in the right-of-way (front yard) to facilitate the installation work.

Connecting service lines to the new mains: Due to coronavirus concerns, CenterPoint Energy has delayed work that requires entering customer homes, such as moving gas meters outside. The purpose of this letter is to advise that with customer permission, crews will now enter homes to complete necessary gas meter work. If you choose not to allow crews to enter your home, gas service will not be interrupted, and we will reschedule for a time better suited to concerns you may have. Crews will continue to replace service lines. Crews may have to dig in the ground on your property in the utility easement and next to your home to complete the task of service line replacement.

Traffic impacts: Work will occur in segments rather than all at once. Lane and parking restrictions are anticipated in areas where active construction is occurring and are necessary to keep both the public and construction personnel safe. Local access will be maintained.
