NOTICE: CenterPoint Energy to upgrade natural gas pipelines in your neighborhood mid-September – late fall 2019

September 11, 2019

Dear Property Owner,

At CenterPoint Energy, we are committed to providing timely and relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

Beginning in the week of September 16 and lasting into late fall 2019, crews from CenterPoint Energy's authorized contractor, Michels Corporation, will be replacing natural gas mains, connecting natural gas service lines to the installed mains, and moving any inside residential meters to the outside of homes. Work will take place along the east and west sides of Queen Avenue N. between 44th Avenue N. and Dowling Avenue N. in Minneapolis. The crews will begin on the west side of Queen Avenue N. at 44th Avenue N. working south to 42nd Avenue N., then on the east side of Queen Avenue N. working north to 44th Avenue N. Parking and lane restrictions are required in areas where construction activity is occurring and is necessary to keep both the public and construction personnel safe. To learn more about this project or to sign up for construction updates, please visit our Construction Zone website at CenterPointEnergy.com/Construction.

Construction will happen in three phases: **Phase 1** consists of installing the natural gas distribution main. **Phase 2** is connecting the individual customer gas service lines to the new gas distribution main. This may include service line replacement and relocating gas meters from inside the home to outside. Customers will experience a short disruption of gas service as the crews are installing the gas service line. Crews may have to dig in the ground on your property in the utility easement to complete the task of service and main distribution line replacement. **Phase 3** is the restoration of disturbed areas affected by our work outside the city construction zone. This may consist of lawn restoration and sidewalk or street restoration as work dictates.

CenterPoint Energy has provided safe, clean and efficient natural gas service to Minnesota communities for more than 145 years. We are proud of this record and strive to improve it by educating the public about the benefits of natural gas at CenterPointEnergy.com/BeSafe. In addition, you can contact one of the following CenterPoint Energy resources:

- Communication Specialist, Hannah Gullickson, at 612-321-5546
