NOTICE: CenterPoint Energy to upgrade natural gas pipelines in your neighborhood June 12 – early August 2019

*Text-to-subscribe for updates regarding this construction project by sending **CNP MOIR to 468311***

- Crews from Michels Corporation, CenterPoint Energy Energy's authorized contractor, will be replacing an existing natural gas distribution main with modern materials in Bloomington from Wednesday, June 12, to early August 2019.
- Project construction will occur along 104th St. W., 105th St. W., Penn Ave. S. and Morgan Ave. S. according to the map below. Work will occur in segments rather than all at once.
- Lane restrictions and road closures are anticipated in areas where active construction is occurring and are necessary to keep both the public and construction personnel safe.
- If any closures are necessary, they will be minimized. Local access will be maintained.
- Further construction will be done by contractors for the City of Bloomington for the city's "[PMP Street Improvement Project](#)."
- For more information or to sign up for updates, please visit CenterPoint Energy's Construction Zone website at CenterPointEnergy.com/Construction.

NOTICE: CenterPoint Energy to upgrade natural gas pipelines in your neighborhood June 12 – early August 2019

June 11, 2019

Dear Property Owner,

At CenterPoint Energy, we are committed to providing timely and relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

Crews from Michels Corporation, CenterPoint Energy Energy's authorized contractor, will be replacing an existing natural gas distribution main with modern materials in Bloomington from Wednesday, June 12, to early August 2019. Project construction will occur along 104th St. W., 105th St. W., Penn Ave. S. and Morgan Ave. S. Work will occur in segments rather than all at once. Further construction will be done by contractors for the City of Bloomington for the city's "[PMP Street Improvement Project](#)."

Construction will happen in three phases: **Phase 1** consists of installing the natural gas distribution main. **Phase 2** is connecting the individual customer gas service lines to the new gas distribution main. This may include service line replacement and relocating gas meters from inside the home to outside. Customers will experience a short disruption of gas service as the crews are installing the gas service line. Crews may have to dig in the ground on your property in the utility easement to complete the task of service and main distribution line replacement. **Phase 3** is the restoration of disturbed areas affected by our work outside the city construction zone. This may consist of lawn restoration and sidewalk or street restoration as work dictates.

Lane restrictions will be anticipated in areas where active construction is occurring and are necessary to keep both the public and construction personnel safe. If any closures are necessary, they will be minimized. Local access will be maintained. To sign up for construction updates, please visit our website at CenterPointEnergy.com/Construction.

CenterPoint Energy has provided safe, clean and efficient natural gas service to Minnesota communities for more than 145 years. We are proud of this record and strive to improve it by educating the public about the benefits of natural gas at CenterPointEnergy.com/BeSafe. In addition, you can contact one of the following CenterPoint Energy resources:

- Communications Specialist, Hannah Gullickson, at 612-321-5546
- Information Hotline at csv.constructionservices@centerpointenergy.com or 612-321-5369
- Restoration Questions at csv.restoration@centerpointenergy.com or 612-321-5042

Please reference the Moir Park Neighborhood project or number 89532613. We appreciate your business and look forward to continuing to serve you.
