NOTICE: CenterPoint Energy to upgrade natural gas pipelines in your neighborhood Oct. 1 – mid-Nov. 2018

September 19, 2018

Dear Property Owner,

At CenterPoint Energy, we are committed to providing timely and relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

CenterPoint Energy will begin replacing the natural gas system prior to the start of the City of Minneapolis's "10th Avenue SE Bridge Rehab" project. CenterPoint Energy's construction is expected to begin in the first week of October and last until mid or late November 2018. Michels Corporation, an authorized CenterPoint Energy contractor, will replace the natural gas mains at the intersection of 2nd Street SE and 11th Avenue SE. Parking and lane restrictions are required in areas where construction activity is occurring and is necessary to keep both the public and construction personnel safe. Although there will be no full closures, pedestrian and bike traffic will be detoured for approx. one week early in the project's duration. To learn more about this project or to sign up for weekly construction updates, please visit our Construction Zone website at CenterPointEnergy.com/Construction.

Construction will happen in three phases: **Phase 1** consists of installing the natural gas distribution main. **Phase 2** is connecting the individual customer gas service lines to the new gas distribution main. This may include service line replacement and relocating gas meters from inside the home to outside. Customers will experience a short disruption of gas service as the crews are installing the gas service line. Crews may have to dig in the ground on your property in the utility easement to complete the task of service and main distribution line replacement. **Phase 3** is the restoration of disturbed areas affected by our work outside the city construction zone. This may consist of lawn restoration and sidewalk or street restoration as work dictates.

CenterPoint Energy has provided safe, clean and efficient natural gas service to Minnesota communities for more than 145 years. We are proud of this record and strive to improve it by educating the public about the benefits of natural gas at CenterPointEnergy.com/BeSafe. In addition, you can contact one of the following CenterPoint Energy resources:
