## **NOTICE: CenterPoint Energy to perform routine inspection on transmission pipe along Nicollet Ave. S. in Sept. – Oct. 2016**

August 29, 2016

Dear Property Owner,

At CenterPoint Energy, we are committed to providing timely and relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

Crews from Michels Corporation and Construction & Maintenance, authorized contractors for CenterPoint Energy, will be performing a routine maintenance on the transmission pipe located along Nicollet Avenue S. between W. 82<sup>nd</sup> Street and W. 98<sup>th</sup> Street in Bloomington. The process will begin in early September after Labor Day and last until approximately mid-October. The process, called pigging, will involve the crews placing tools every 1,000 feet along the pipe to inspect the pipe's condition. Per federal regulation, CenterPoint Energy is required to check the condition of its pipes routinely.

Since the pipe runs underneath Nicollet Avenue S., the crews will put traffic control in place starting after Labor Day. CenterPoint Energy will send updates regarding the progress of the maintenance and traffic control. During the maintenance, residential driveways will remain open, and the homes' gas lines will remain active. CenterPoint Energy wants to thank you for your patience.

CenterPoint Energy has provided safe, clean and efficient natural gas service to Minnesota communities for more than 145 years. We are proud of this record and strive to improve it by educating the public about the benefits of natural gas and how to use it safely and efficiently. CenterPoint Energy provides information for you at [CenterPointEnergy.com/BeSafe](http://CenterPointEnergy.com/BeSafe).
