## **NOTICE: CenterPoint Energy to upgrade natural gas pipelines in your neighborhood approx. Sept. 6 – Oct. 28, 2016**

August 30, 2016

Dear Property Owner,

At CenterPoint Energy, we are committed to providing timely and relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

Crews from Michels Corporation, an authorized contractor for CenterPoint Energy, will begin construction on the new natural gas pipe along 68<sup>th</sup> Avenue N. (County Road 130) in Brooklyn Park approximately Tuesday, September 6. The construction is expected to take approximately six to eight weeks. The crews are installing about 4,600 feet of natural gas distribution main along 68<sup>th</sup> Avenue N. from Adair Avenue N. to just past Jersey Avenue N., and also along Jersey Avenue N. and Edgewood Avenue N. between 68<sup>th</sup> Avenue N. and Bethia Lane N. The crews will be starting on the west end of the project working their way eastward.

CenterPoint Energy will be boring the pipe underneath the soil's surface. Existing gas service lines will be connected to the gas main. (A gas service line is a small pipe connecting the resident's gas to the main line in the street.) Customers will experience a short disruption of gas service.

Crews may have to dig in some residents' properties in the utility easement to achieve this task. If a resident's property is disturbed, CenterPoint Energy will be responsible for restoring the hard and soft surfaces affected by construction. This is at no cost to the customer or resident of the construction area.

CenterPoint Energy has provided safe, clean and efficient natural gas service to Minnesota communities for more than 145 years. We are proud of this record and strive to improve it by educating the public about the benefits of natural gas and how to use it safely and efficiently. CenterPoint Energy provides information for you at [CenterPointEnergy.com/BeSafe](http://CenterPointEnergy.com/BeSafe).
