## **NOTICE: CenterPoint Energy to upgrade natural gas pipelines in your neighborhood approx. Sept. 12 – Oct. 14, 2016**

September 6, 2016

Dear Property Owner,

At CenterPoint Energy, we are committed to providing timely and relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

Crews from Michels Corporation, an authorized contractor for CenterPoint Energy, will begin construction on the new natural gas pipe along Oak Street in Excelsior on about Monday, September 7. The construction is expected to take approximately five weeks. The crews are installing about 2,690 feet of natural gas distribution main along the southwestern side of Oak Street from Beehrle Avenue to Highway 7. (See map for detail.) While the crews are working on the southeastern side of Oak Street, they will maintain two-way traffic for the length of the project.

In addition, CenterPoint Energy will be connecting about 30 gas service lines to the gas main. (A gas service line is a small pipe connecting the resident's gas to the main line in the street.) Customers will experience a short disruption of gas service.

Crews may have to dig in some residents' properties in the utility easement to achieve this task. If a resident's property is disturbed, CenterPoint Energy will be responsible for restoring the hard and soft surfaces affected by construction. This is at no cost to the customer or resident of the construction area.

CenterPoint Energy has provided safe, clean and efficient natural gas service to Minnesota communities for more than 145 years. We are proud of this record and strive to improve it by educating the public about the benefits of natural gas and how to use it safely and efficiently. CenterPoint Energy provides information for you at [CenterPointEnergy.com/BeSafe](http://CenterPointEnergy.com/BeSafe).
