NOTICE: CenterPoint Energy to perform Phillips Neighborhood project from early April to fall 2020

***Text-to-subscribe for updates regarding this construction project by sending
CNP PHILLIPS to 468311***

Dear Property Owner,

At CenterPoint Energy, we are committed to providing timely and relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

Due to coronavirus concerns, CenterPoint Energy is delaying meter work that requires entering customer homes or disrupting customer gas service until further notice.

Project Description: CenterPoint Energy's project is anticipated to last from the first week of April to fall 2020. (The crews will begin work on 17th Ave. S. from 29th to Lake Streets E. then on 13th Ave. S. from 25th to 29th Streets E. before 14th Ave. S. from 25th to 31st Streets E.) Crews from Michels Corporation, CenterPoint Energy's authorized contractor, will replace natural gas mains and connect natural gas service lines to the new mains. Crews from Q3 Contracting, CenterPoint Energy's authorized contractor, will restore the areas affected by Michels Corporation's work outside the limits of the City of Minneapolis's [Street Resurfacing Program](#).

Installing replacement gas mains: CenterPoint Energy's authorized contractor, Michels Corporation, will be installing the replacement gas main on this project. According to [the Governor of Minnesota's order](#), gas main replacement is an essential work function. This allows for the modernization of related gas facilities. The gas main work requires excavations in various locations in the right-of-way (front yard) to facilitate the installation work.

Connecting service lines to the new mains: Due to coronavirus concerns, CenterPoint Energy is delaying work that requires entering customer homes, such as moving gas meters outside. Gas service will not be interrupted. Crews will continue to replace service lines. A new service line will be replaced from the new main up to the resident's home where the outside meter would be placed. (If the meter is outside, the service line will be connected to it.) Crews may have to dig in the ground on your property in the utility easement and next to your home to complete the task of service line replacement.

Traffic impacts: On the project's roads with eastbound and westbound traffic, parking will be restricted on both sides in areas of active construction. On the project's roads with northbound and southbound traffic, parking will be restricted on the side where the crews are working. Any road closures will be minimized. Lane and parking restrictions are anticipated in areas where active construction is occurring and are necessary to keep both the public and construction personnel safe. Local access will be maintained.
