## NOTICE: CenterPoint Energy to begin upgrading natural gas pipelines in your neighborhood in May 2016

*Text-to-subscribe for updates regarding this construction project by sending **CNP TRACYAVENUE to 468311***

- In preparation for a City of Edina reconstruction project, CenterPoint Energy will upgrade approximately 3,827 feet of various diameter natural gas distribution pipe and replace approximately 30 natural gas service lines along Tracy Avenue, from Valley View Road to Benton Avenue.
- In early May, CenterPoint Energy's construction is anticipated to move outside of the current construction project, north of Olinger Boulevard, and will require approximately two months to complete the work.
- Please anticipate lane shifts, no parking and traffic disruptions in the areas of construction.
- **For additional information or to sign up for periodic construction updates, please visit our Construction Zone website at: [www.CenterPointEnergy.com/Construction](http://www.CenterPointEnergy.com/Construction).**

## **NOTICE: CenterPoint Energy to begin upgrading natural gas pipelines in your neighborhood in May 2016**

April 26, 2016

Dear Property Owner,

At CenterPoint Energy, we are committed to providing timely and relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

In preparation for a City of Edina reconstruction project, Michels Corporation, an authorized CenterPoint Energy contractor, will be upgrading approximately 3,827 feet of various diameter natural gas distribution pipe along Tracy Avenue, from Valley Road to Benton Avenue (see map for detail). Construction is expected to move outside of the current construction project, north of Olinger Boulevard, in early May 2016. Construction will continue for approximately two months. We will restore the areas affected by our construction in compliance with all applicable federal, state and local regulations.

The work will also include the replacement of approximately 30 natural gas service lines. Representatives from CenterPoint Energy will contact residents whose gas service may be affected to schedule the necessary construction work on their property. In addition, your gas meter will be evaluated and replaced if necessary. If the gas meter is located inside your home or building, we will move it to an outside location.

CenterPoint Energy has provided safe, clean and efficient natural gas service to Minnesota communities for more than 140 years. We are proud of this record and strive to improve it by educating the public about the benefits of natural gas and how to use it safely and efficiently. CenterPoint Energy provides information for you to learn how to be safe around natural gas pipelines at [www.CenterPointEnergy.com/BeSafe](http://www.CenterPointEnergy.com/BeSafe).
