Dear Property Owner,

CenterPoint Energy is in the final stage of replacing approximately 1,300 feet of 20-inch natural gas distribution pipe located along Emerson Avenue S. between Franklin Avenue W. and Douglas Avenue. The project will impact traffic and parking in the area, and is expected to be completed by December 18, 2015.

Emerson Avenue S. will be closed to through traffic, but access to local driveways will remain open throughout the final stages of the project. A detour will be in place rerouting traffic, pedestrians and cyclists to ensure the safety of the public and crews that are working on the project.

We understand that the Emerson Avenue S. construction project is an inconvenience to people living, working and commuting in and around the area, so we greatly appreciate your patience and understanding as we work to complete construction as safely and quickly as possible.

Restoration will follow construction in December, with final restoration efforts continuing in spring 2016.

Residents with questions are invited to call CenterPoint Energy's Communications Specialist, Ashley Osteraas at 612-321-5546 or the Construction Hotline at 612-321-5329 to talk with a representative about the project. For more information, please visit our Construction Zone website at:
