

CenterPoint Energy to Upgrade Natural Gas Pipelines in Your Neighborhood

August 22nd, 2014

Dear Property Owner,

At CenterPoint Energy, we are committed to providing timely and relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

In preparation for a Hennepin County road reconstruction project, Michels Corporation, an authorized CenterPoint Energy contractor, will replace approximately 9,000 feet of 10-inch steel pipe with 12-inch steel pipe along County Road 101, from Minnetonka Boulevard to Highway 12 in mid-September. Construction from Breezy Point Road to Minnetonka Boulevard will begin in early-October. Construction is expected to be completed by late November 2014. We will restore the areas affected by our construction in compliance with all applicable federal, state and local regulations.

The work will also include the replacement of approximately 50 natural gas service lines. Representatives from CenterPoint Energy will contact residents whose gas service may be affected to schedule the necessary construction work on their property. In addition, your gas meter will be evaluated and replaced if necessary. If the gas meter is located inside your home or building, we will move it to an outside location.

CenterPoint Energy has provided safe, clean and efficient natural gas service to Minnesota communities for more than 140 years. We are proud of this record and strive to improve it by educating the public about the benefits of natural gas and how to use it safely and efficiently.
