## **NOTICE: CenterPoint Energy to begin upgrading natural gas pipelines in your neighborhood in mid-November 2015**

November 10, 2015

Dear Property Owner,

At CenterPoint Energy, we are committed to providing timely and relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

In preparation for a City of New Hope's 2016 road reconstruction project, Michels Corporation, an authorized CenterPoint Energy contractor, will be replacing approximately 6,968 feet of various diameter steel pipe with approximately 6,560 feet of various diameter steel and plastic pipe along various streets (see map for detail). Construction is expected to begin in mid-November of 2015 and will require approximately four weeks to complete the work. We will restore the areas affected by our construction in compliance with all applicable federal, state and local regulations.

In the spring of 2016, crews will return onsite to replace approximately 68 natural gas service lines. Representatives from CenterPoint Energy will contact residents whose gas service may be affected to schedule the necessary construction work on their property. In addition, your gas meter will be evaluated and replaced if necessary. If the gas meter is located inside your home or building, we will move it to an outside location.

CenterPoint Energy has provided safe, clean and efficient natural gas service to Minnesota communities for more than 140 years. We are proud of this record and strive to improve it by educating the public about the benefits of natural gas and how to use it safely and efficiently. CenterPoint Energy provides information for you to learn how to be safe around natural gas pipelines at [www.CenterPointEnergy.com/BeSafe](http://www.CenterPointEnergy.com/BeSafe).
