NOTICE: CenterPoint Energy to begin upgrading natural gas pipelines in your neighborhood the week of June 13, 2016

June 13, 2016

Dear Property Owner,

At CenterPoint Energy, we are committed to providing timely and relevant information to our customers and the general public to minimize inconvenience or disruption due to our construction activities.

In preparation for a City of Wayzata project, crews from CenterPoint Energy will be installing a 12" steel pipeline near the intersection of Central Avenue S. and Wayzata Boulevard (see map for detail). Construction is expected to begin the week of June 13, 2016 and will last approximately into September 2016. The first stage of the project will be installing a 12" pipeline during the week of June 13 – June 27. The second stage will include cutting and abandoning the 10" steel pipeline in September. The second stage will take approximately 1 week. No work is expected to be done in late July and August.

No streets will be completely closed during this project. The streets that the project will be near are Central Avenue S., Circle Drive E., and Lake Street E., as well as Lasalle Street, Hampton Street S., and Reno Street. Central Avenue will be closed north of Circle Drive E. during the week of June 13 – June 27. To minimize traffic disruption, crews will be working overnight hours between 9 p.m. and 5 a.m. During these hours, traffic signals will be put on flash and then return to normal after 5 a.m.

CenterPoint Energy has provided safe, clean and efficient natural gas service to Minnesota communities for more than 140 years. We are proud of this record and strive to improve it by educating the public about the benefits of natural gas and how to use it safely and efficiently. CenterPoint Energy provides information for you at www.CenterPointEnergy.com/BeSafe.
